ON VIEW:

### PAUL BUSSE GARDEN RAILWAY

All aboard! Explore four unique botanical themes on an enchanting and immersive scale. Located the Grand Mallway.

### GARDEN SAFARI

Thirty larger-than-life animals from the Conservatory's Topiary Collection.

### CHIHULY COLLECTION

Eighteen installations of stunning glass art displayed throughout the interior Conservatory.

### BONSAI COLLECTION

Tropical bonsai are displayed in the Dorothy M. Davis Showhouse and on the Botanical Garden Welcome Patio.

### LIGHT RAIMENT II

Internationally renowned light artist James Turrell's architectural light installation illuminates the John F. Wolfe Palm House in an inspiring display of light.

## SCAVENGER HUNT

Try to find these insects hidden around the Conservatory.  
HINT: They are located near the plant they connected with.

### Monarch Butterfly

Monarch Butterflies are matched with the Monarch Fern because of their name. Monarch Fern fronds look like butterflies.

PACIFIC ISLAND WATER GARDEN

### Sweat Bee

Sweat Bees are common pollinators of Venus Fly traps. They don't get eaten because the flowers are so tall and away from the traps.

NORTH COURTYARD CARNIVOROUS PLANT BOG

### Hawk Moth

Hawk Moths are great pollinators. They are nighttime pollinators. They commonly pollinate the Century Plant.

DESERT BIOME

### Cacao Midge

These tiny flies called Cacao Midges are the ONLY pollinator of Cacao Trees. Cacao trees are the plants that give us cacao pods to make chocolate.

TROPICAL RAINFOREST

### Pipevine Swallowtail

Pipevine Swallowtails lay their eggs on Dutchman's Pipevine. After the caterpillars hatch, they will eat the leaves until they are ready to form a chrysalis.

SCOTT'S MIRACLE-GRO FOUNDATION CHILDREN'S GARDEN

### Moss Bugs

Moss Bugs or Peloridiidae often live and feed on mosses. They are native to Patagonia, New Zealand, and Australia.

HIMALAYAN MOUNTAINS
